Command line

## Popular frameworks

To build advanced deep learning solutions

PyTorch

TensorFlow

Scikit-Learn

ONNX

## Productive services

To empower data science and development teams

Azure  
Databricks

Azure Machine  
Learning

Machine  
Learning VMs

## Powerful infrastructure

To accelerate deep learning

CPU

GPU

FPGA

From the Intelligent Cloud to the Intelligent Edge

# Productive Services

To empower data science and development teams

## Azure Machine Learning

Python-based machine learning service

Develop models faster with automated machine learning

Use any Python environment and ML frameworks

Manage models across the cloud and the edge.

## Azure Databricks

Apache Spark-based big-data service

Prepare data clean data at massive scale

Enable collaboration between data scientists and data engineers

Access machine learning optimized clusters

# Azure Machine Learning service

Bring AI to everyone with an end-to-end, scalable, trusted platform

Boost your data science productivity

Increase your rate of experimentation

Deploy and manage your models everywhere

Built with your needs in mind

- Automated machine learning
- Managed compute
- DevOps for machine learning
- Simple deployment
- Tool agnostic Python SDK
- Support for open source frameworks

Seamlessly integrated with the Azure Portfolio

# Azure Databricks

Fast, easy, and collaborative Apache Spark™-based analytics platform

**Increase productivity**

**Build on a secure, trusted cloud**

**Scale without limits**

**Built with your needs in mind**

- Optimized Apache Spark environment
- Collaborative workspace
- Integration with Azure data services
- Autoscale and autoterminate
- Optimized for distributed processing
- Support for multiple languages and libraries

Seamlessly integrated with the Azure Portfolio

# Leverage deep learning services and frameworks

## AZURE ML SERVICE

Bring AI to the edge

Increase your rate of experimentation

Deploy and manage your models everywhere

## AZURE DATABRICKS

Accelerate processing with the fastest Apache Spark engine

Integrate natively with Azure services

Access enterprise-grade Azure security

## Leverage your favorite deep learning frameworks

TensorFlow

MS Cognitive Toolkit

PyTorch

Scikit-Learn

ONNX

Caffe2

MXNet

Chainer

# Productive Services

What to use when?

Customer journey

Data Prep

Build and Train

Manage and Deploy

Python ML developer

**Azure ML service**

(Pandas, NumPy etc. on AML Compute)

**Azure ML service**

(OSS frameworks, Hyperdrive, Pipelines, Automated ML, Model Registry)

**Azure ML service**

(containerize, deploy, inference and monitor)

Apache Spark / Big Data

**Azure Databricks**

(Apache Spark Dataframes, Datasets, Delta, Pandas, NumPy etc.)

**Azure Databricks + Azure ML service**

(Spark MLlib and OSS frameworks + Automated ML, Model Registry)

**Azure ML service**

(containerize, deploy, inference and monitor)

# Powerful infrastructure

Accelerate deep learning

## CPUs

---

General purpose  
machine learning  
D, F, L, M, H Series

## GPUs

Deep learning  
N Series

## FPGAs

---

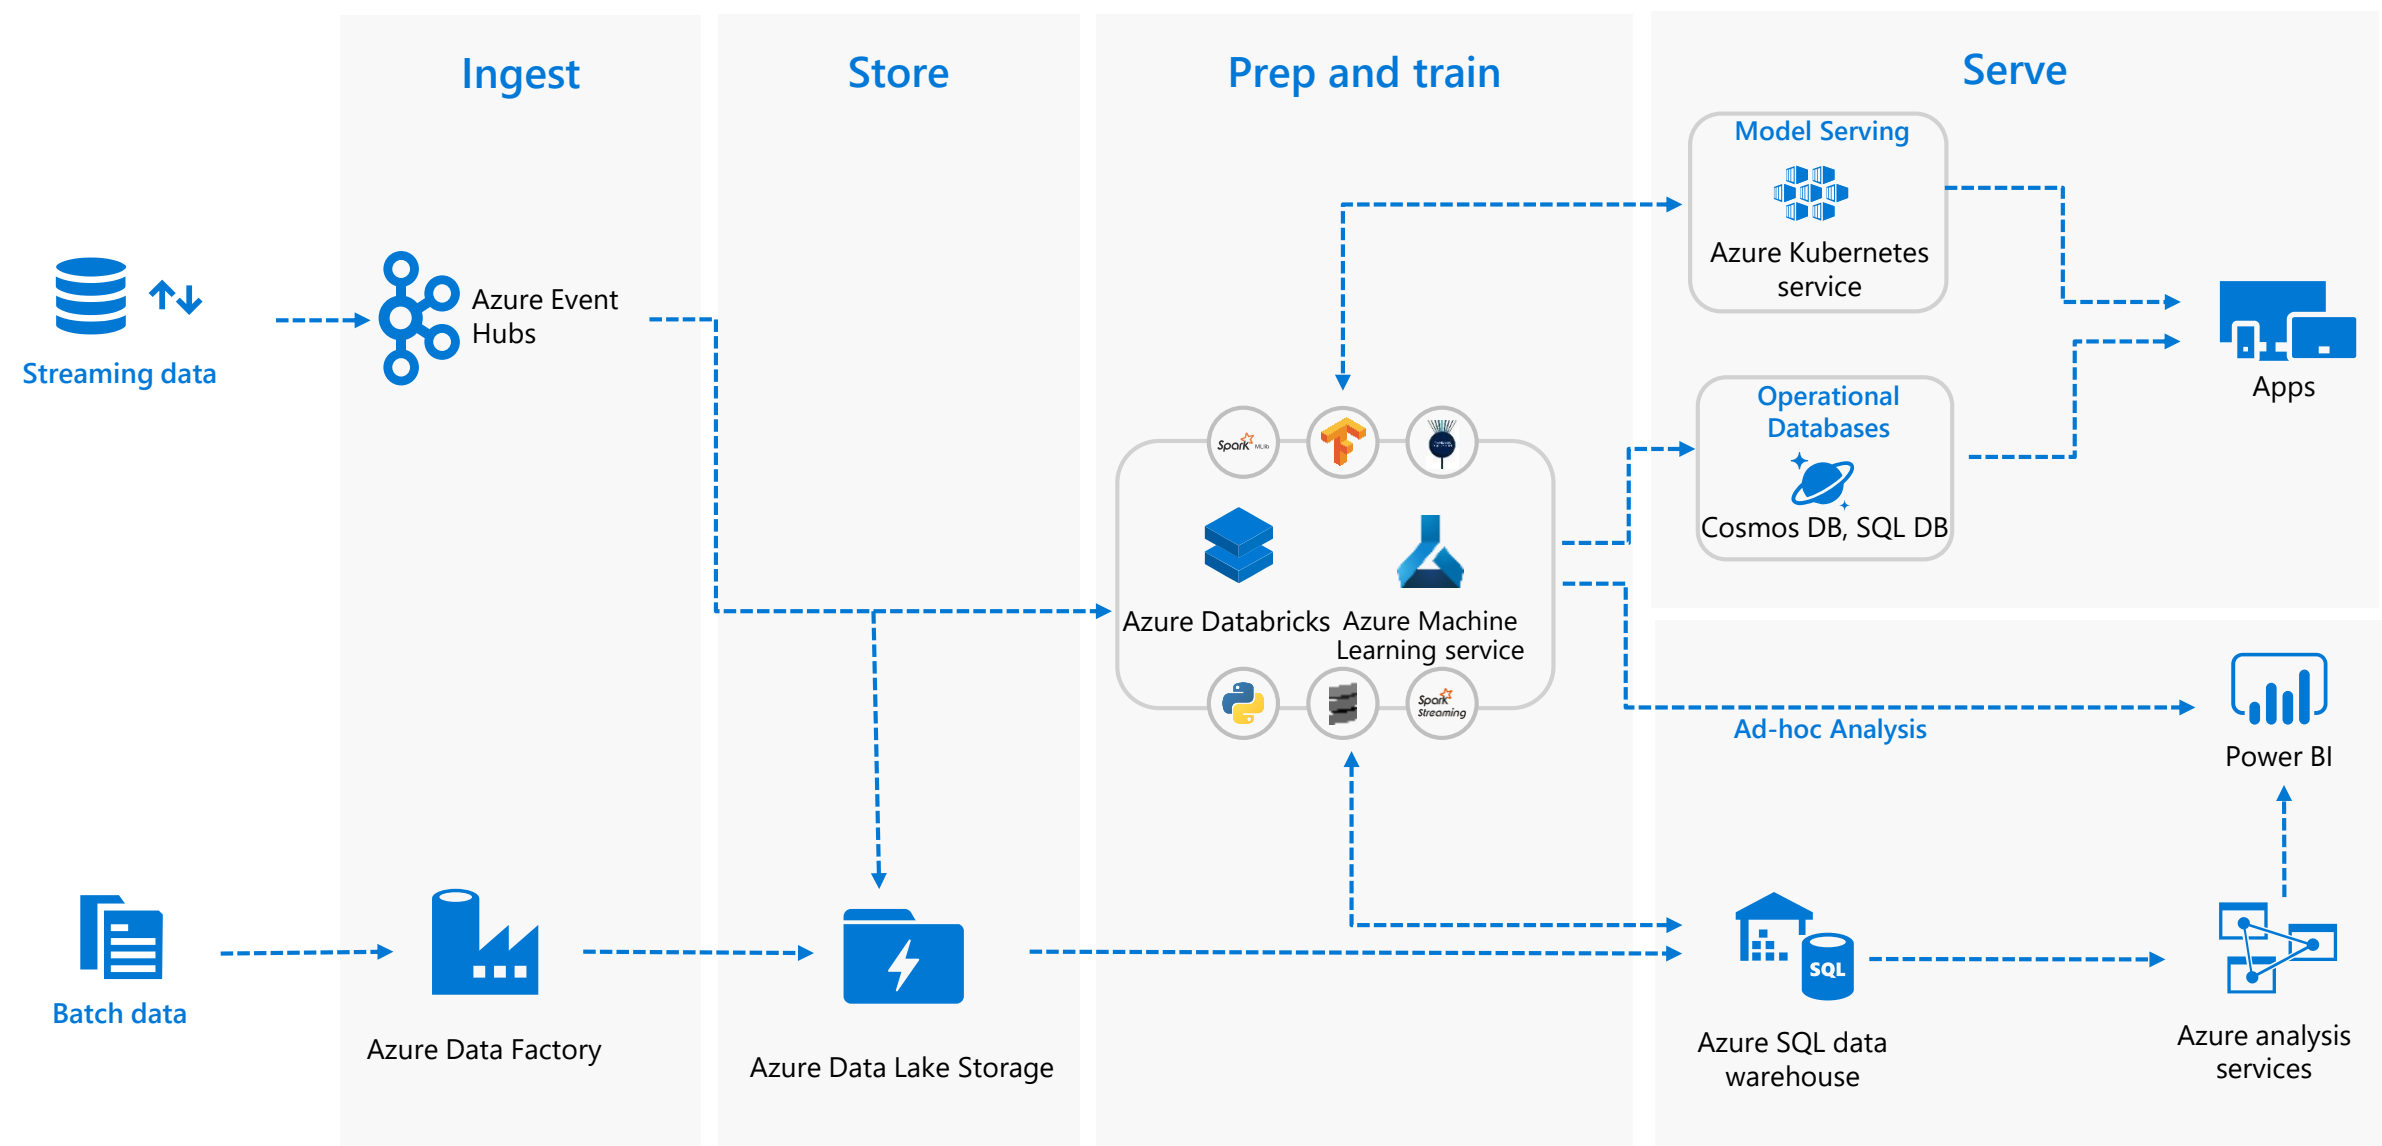

Specialized hardware  
accelerated deep learning  
AML hardware accelerated  
models (Project Brainwave)

← Optimized for flexibility

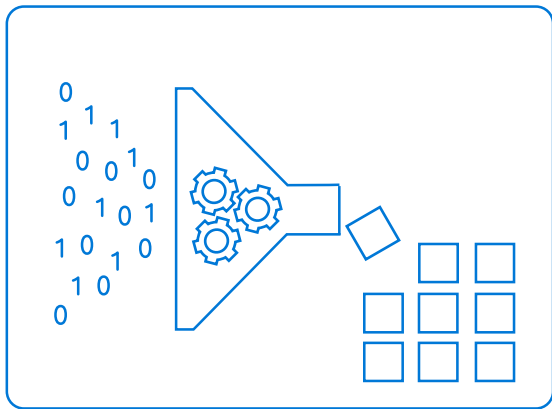

→ Optimized for performance

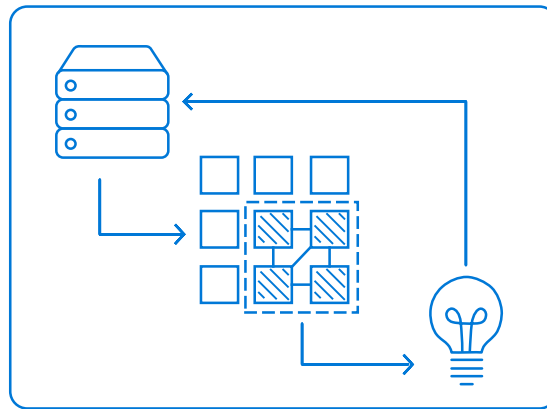

# Recommended architecture to build e2e ML solutions

## PREP & TRAIN

Collect and prepare data

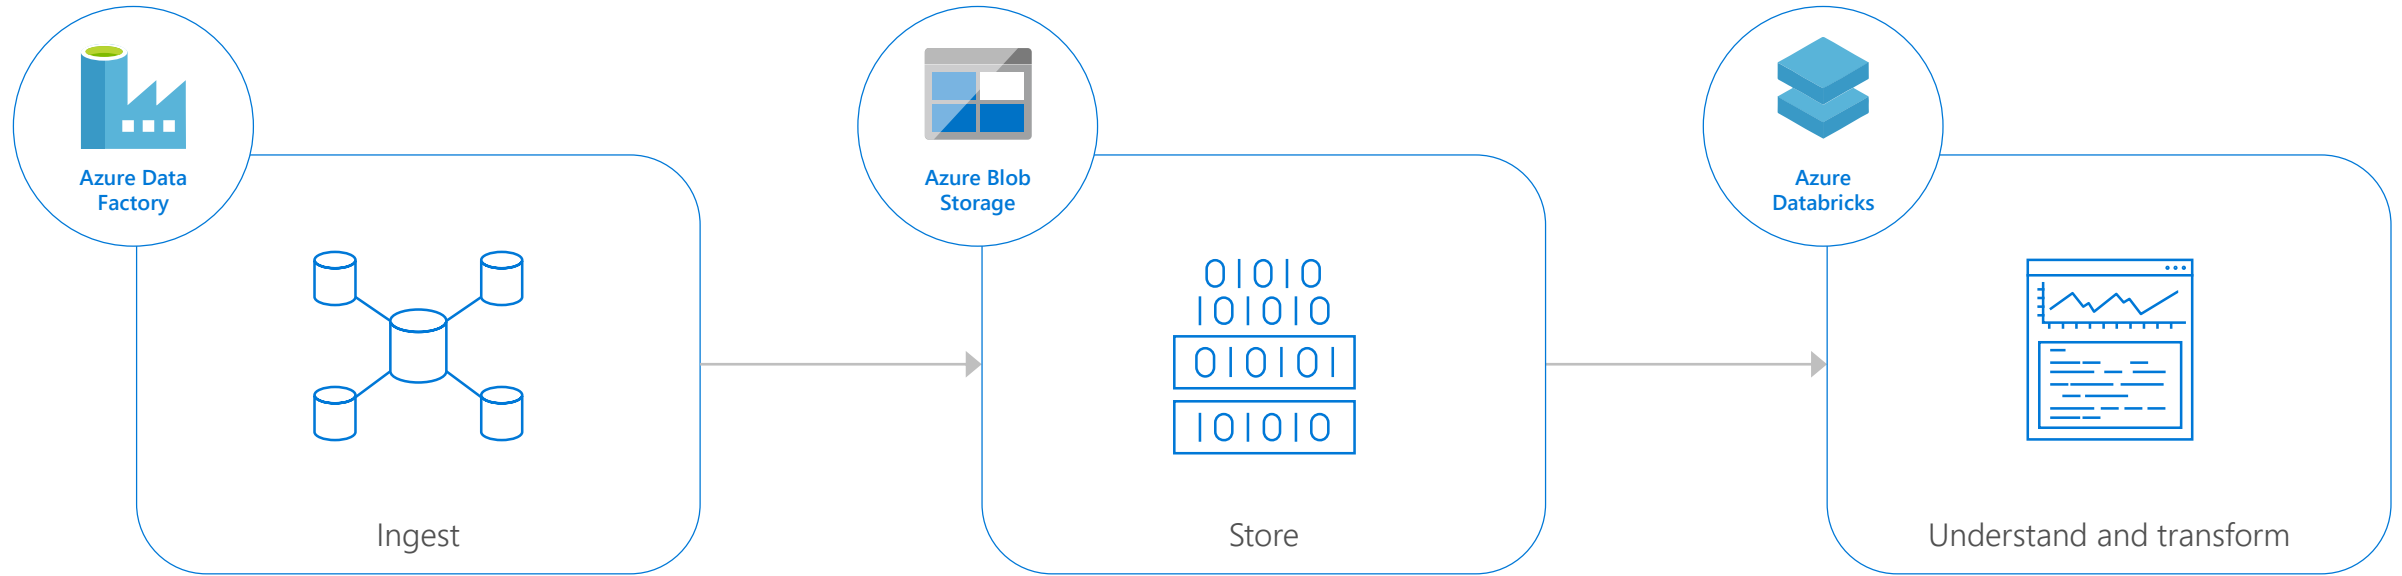

Train and evaluate model

Operationalize and manage

# Collect and prepare all of your data at scale

## Connect to data from any source

- Integrate with all of your data sources
- Create hybrid pipelines
- Orchestrate in a code-free environment

## Leverage best-in-class analytics capabilities

- Leverage open source technologies
- Collaborate within teams
- Use ML on batch streams

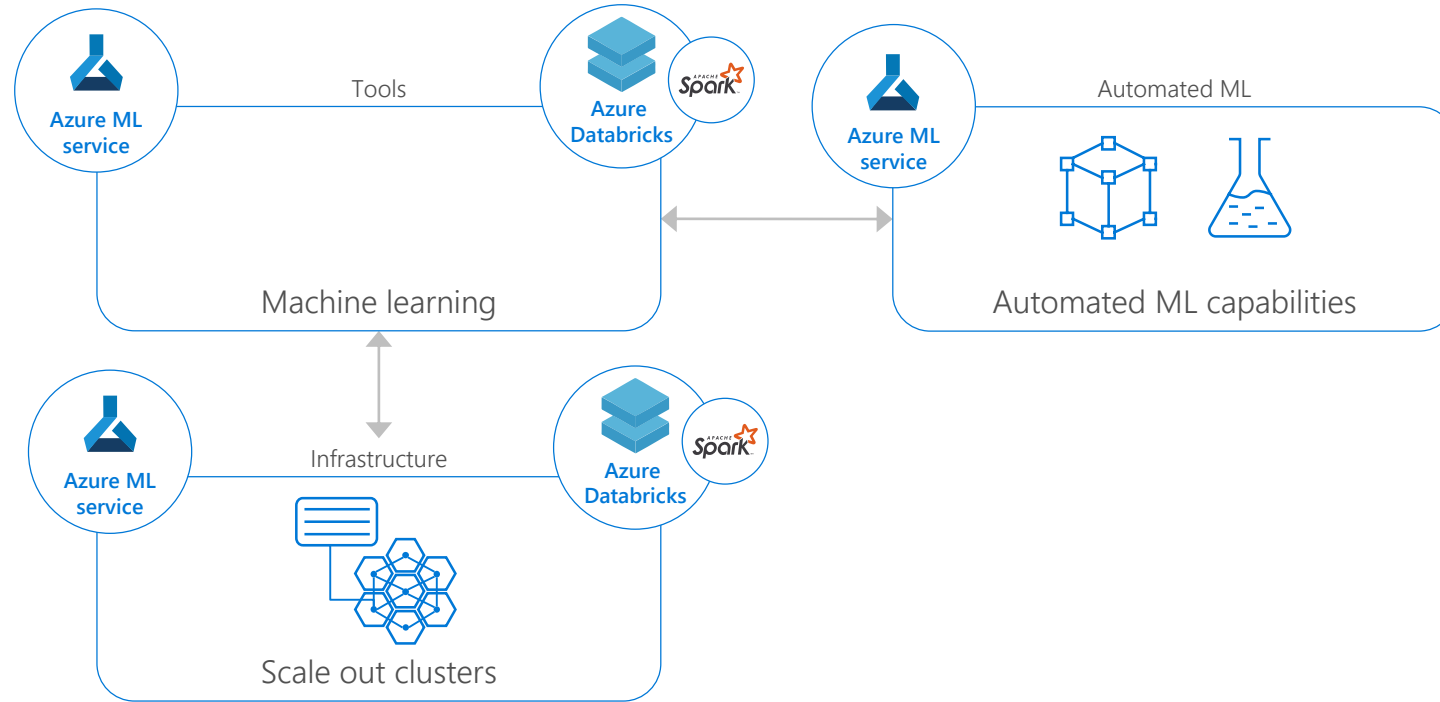

## Scale without limits

- Build in the language of your choice
- Leverage scale out topology
- Scale compute and storage separately

# Train and evaluate machine learning models

## Simplify model development

- Collaborate in interactive workspaces
- Access a library of battle-tested models
- Automate job execution

## Scale compute resources to meet your needs

- Easily scale up or scale out
- Autoscale on serverless infrastructure
- Leverage commodity hardware

## Quickly determine the right model for your data

- Determine the best algorithm
- Tune hyperparameters to optimize models
- Rapidly prototype in agile environments

# Operationalize and manage models with ease

## Bring models to life quickly

- Build and deploy models in minutes
- Iterate quickly on serverless infrastructure
- Easily change environments

## Proactively manage model performance

- Identify and promote your best models
- Capture model telemetry
- Retrain models with APIs

## Deploy models closer to your data

- Deploy models anywhere
- Scale out to containers
- Infuse intelligence into the IoT edge

# DevOps loop for data science

## Prepare

Prepare  
Data

## Experiment

Build model

Deploy Service  
Monitor Model

# Azure Cognitive Services

Give your apps a human side

## Vision

From objects to faces and feelings, enable your apps to analyze still images and video

## Speech

Speak to and hear your users, compensating for environmental noise.  
Use with **Language** for max results

## Language

Analyze text to extract user feeling and intent.  
Extract knowledge from existing sources and make it easily accessible to users  
Translate between 60+ languages and growing

## Search

Access billions of web pages, images, videos, and news with the power of Bing

# Feature overview

Azure Cognitive Services

## Vision

What is in the image or video?

Extract Image insights

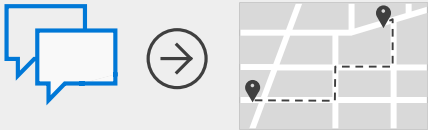

Category	People; 5 faces
Adult/Racy?	False/False
Dominant colors	
Accent color	

## Speech
